# RECORD HIGH M&A volumes breach \$5-trn mark for first time globally

NIKET NISHANT  
December 31

**GLOBAL DEALMAKING** IS set to maintain its scorching pace next year, after a historic year for merger and acquisition (M&A) activity that was fuelled largely by easy availability of cheap financing and booming stock markets.

Global M&A volumes topped \$5 trillion for the first time ever, comfortably eclipsing the previous record of \$4.55 trillion set in 2007, Dealogic data showed. The overall value of M&As stood at \$5.8 trillion in 2021, up 64% from a year earlier, according to Refinitiv.

Flush with cash and encouraged by soaring stock market valuations, large buyout funds, corporates and financiers struck 62,193 deals in 2021, up 24% from the year-earlier period, as all-time records tumbled during each month of the year.

Investment bankers said they are expecting the deal-making frenzy to continue well into next year, despite looming interest rate hikes.

Higher interest rates increase borrowing costs, which may slow down M&A activity. However, deal advisers still ex-

Large buyout funds, corporates and financiers struck 62,193 deals in 2021, up 24% y-o-y

Deals in sectors such as technology, financials, industrials, and energy and power accounted for bulk of M&A volumes

included AT&T Inc's \$43 billion deal to merge its media businesses with Discovery; the \$34 billion leveraged buyout of Medline Industries; Canadian Pacific Railway's \$31 billion takeover of Kansas City Southern; and the breakups of American corporate behemoths General Electric Co and Johnson & Johnson.

According to a survey of dealmakers and advisers by Grant Thornton, over two-thirds of participants believe deal volumes will grow despite challenges posed by regulations and the pandemic.

Deals in sector such as technology, financials, industrials, and energy and power accounted for the bulk of M&A volumes. Buyouts backed by private-equity firms more than doubled this year to cross the \$1-trillion mark for the first time ever, according to Refinitiv data.

Despite a slowdown in activity in the second half, deal-making involving special purpose acquisition companies further boosted M&A volumes in 2021. SPAC deals accounted for about 10% of the global M&A volumes and added several billions of dollars to the overall tally.

## Europe's shared notes and coins turn 20 at New Year's

**THE EUROPEAN CENTRAL** Bank is celebrating the 20th anniversary of euro notes and coins as member countries wrestle with the pandemic's impact on the economy and the European Union forges a new level of financial cooperation to help boost the recovery.

The event is being marked at midnight New Year's Eve with a light display in blue and yellow, the colours of the EU, projected on its skyscraper headquarters in Frankfurt, Germany.

The introduction of notes and coins in 12 countries on January 1, 2002, was a massive logistical undertaking that followed up on the introduction of the euro for accounting purposes and electronic payments three years earlier, on January 1, 1999. Today, the euro is used in 19 of 27 EU countries.

## EU records first drop in sparkling wine exports in decade as champagne loses its fizz

**THE EUROPEAN UNION'S** exports of sparkling wine to the rest of the world fell last year for the first time in a decade, Eurostat said on Friday, largely because of a massive drop in champagne sales, though prosocco and cava sold well. The Covid-19 pandemic dampened wine trade globally in 2020, the latest year for which data are available, as restaurants and bars remained closed for long periods.

Champagne was hit the hardest. Sales outside the EU of the famed French sparkling wine fell over 20% by volume to 66 million litres in 2020 from nearly 84 million litres the previous year.

That largely contributed to a 6% overall drop in EU exports of sparkling wines last year compared to 2019, the Eurostat data showed. EU exports fell from a peak of 528 million litres in 2019 to 494 million litres in 2020 - still nearly twice the level recorded in 2010. Of the three main categories of sparkling wine exported from the EU, only champagne recorded a significant drop by volume.

Prosocco, which is by far the most exported, recorded sales outside the EU of 205 million

litres in 2020, compared to nearly 207 million litres in 2019. Cava, which is produced in Spain, bucked the trend by increasing its extra-EU exports by more than 10% to 58 million litres in 2020, getting closer to replacing champagne as the second most sold EU sparkling wine outside the 27-nation bloc.

Total champagne sales, including in the EU, fell 18% last year by volume, producers' group CIVC has estimated.
